VCERAM

Your Trusted

Digital Dental Lab

For High-Quality Restorations

WELCOME TO OUR COMPANY

Introduction

At Vceram Dental solutions, we are committed to providing top-notch dental restorations using state-of-the-art digital technology and materials. With our expertise and dedication to quality, we offer a range of restorations including Nanoksa G-Plus, Zirconia, Emax, and Aligners, catering to the diverse needs of our esteemed clients.

Our Vision

Leading revolution in digital dentistry world by creating digital dental restorations without Fracture anymore and with high aesthetics and transparency

Our Mission

Selecting new materials with special techniques to change the methodology of digital dentistry restorations by using materials that can absorb any force to give the dental implants restoration long lifetime with high fracture resistance

Nanoksa G Plus Restorations

Why should we use Nanoksa G – PLUS in U.S dental Solutions?

Nanoksa G plus is leading a revolution in digital dentistry world, The main characteristic advantage of this material is its unique composition that combines between flexibility and the absorption of force strength as well as high flexural strength.

A mixture of biocompatible polymers was used to be filled with a special mixture of Nanomaterials. The Nanoksa G – PLUS is a material with high aesthetics and transparency that mimics the color of natural teeth and has excellent resistance to abrasion and color stability.

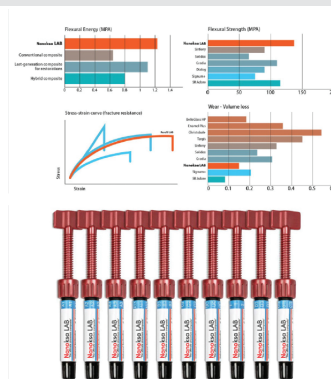

We're providing the ability of creating professional and technical additions by dentist or the dental technician that simulate natural shade for both gingiva and tooth.as it contains complete coloring system that restore dentinal and enamel shades

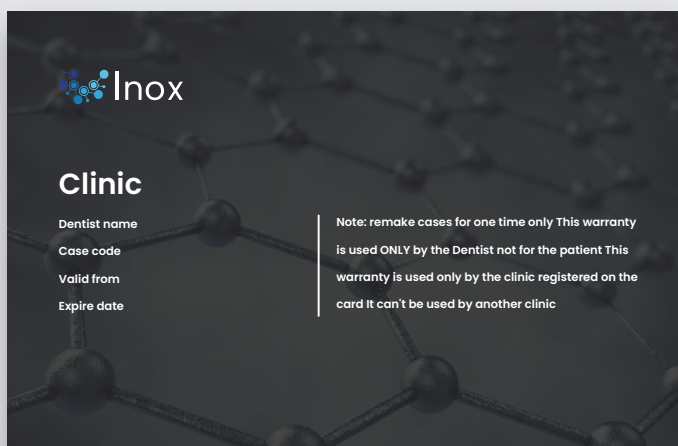

1. Nanoksa stain that stimulate the color of natural teeth

2. Nanoksa gingiva that stimulate the color of natural gingiva with variety of shades.

3. Nanoksa lab that stimulate building of tooth either in Lab or Clinic with Composite hybrid Zirconia

Nanoksa G Plus gurantee card

SPECS :

1. Indications:

Class II for permanent restorations.

2. Material Composition:

High performance polymers filled with Nano-Zirconia and Carbon for the production of dental implants.

3. Strength characteristics:

Absorption	ISO 1047	ug/mm ³	4.9
Solubility	ISO 1047	ug/mm ³ < 0.1	
Tensile test maximum load	ISO 178 N		294
Breaking load	ISO 178 N	237	
Tensile test maximum load	ISO 527 N		3274
Breaking load	ISO 527 N	2639	

4. Available shades:

Tooth shades: Available in Bleach, A1, A2, A3, A3.5
Gingival shades: G0 (light), G1 (Standard), G3 (Med), G4 (Dk)

5. Full Service:

Implant verification, custom tray and wax rim: 8 days
Wax setup: 4 days
Try-in implant prosthesis: 5 days
Final G plus Nanoksa Implant Prosthesis: 9 days

6. Resources:

It's CE Certificate approved

Emax Restorations

Veneers restorations are another excellent option that combines strength and beauty. Made from lithium disilicate glass-ceramic, Emax restorations offer exceptional translucency, mimicking the natural appearance of teeth. With its impressive flexural strength and durability, Emax brings harmony to restorations like veneers, inlays, onlays, and crowns, providing reliable and visually pleasing results.

And Vceram special cementation kit

Guaranteed Quality: We take immense pride in our work and therefore offer a guarantee on our Emax restorations. This assures you that our restorations meet the highest standards of quality, ensuring both your satisfaction and the best results for your patients.

Vceram special gurantee card made for you

Zirconia Restorations

Our dental lab specializes in crafting durable and aesthetically pleasing zirconia restorations. Zirconia, a renowned high-performance ceramic material, is widely used in dentistry due to its exceptional strength, natural-looking appearance, and biocompatibility. Whether your patients need crowns, bridges, or implant-supported restorations, our zirconia restorations ensure optimum durability and long-lasting beauty.

Aligners

In addition to our expertise in traditional restorations, we also offer aligners. These transparent and removable orthodontic appliances are gaining immense popularity due to their convenience and effectiveness in correcting teeth misalignments. Our aligners are custom-made using cutting-edge technology, ensuring a comfortable fit and effective treatment for your patients.

Quality Control

At Vceram dental lab , we understand the importance of precise and accurate dental restorations. Therefore, we implement rigorous quality control measures to ensure the best possible outcomes for every case. Our experienced technicians utilize advanced digital technology, coupled with meticulous attention to detail, to guarantee that each restoration meets your exact specifications.

Partnering with us, you can expect

- Consistent quality assurance throughout the fabrication process.
- On-time delivery of restorations, ensuring efficient patient care.
- Open communication and customization options based on your preferences.
- Dedicated customer support for any inquiries or assistance you may need.
